THE INFORMATION LISTED BELOW PROVIDES YOU WITH BASIC FEATURES OF EVOLVE WORKSURFACES.

- Evolve thermally fused worksurfaces are 1” thick, high pressure is 1 1/16” and 1 7/16” thick. These are finished with 3 mm PVC edging on all sides.
- Standard laminate offerings are available in thermally-fused (TF) and most high pressure laminates (HP). See laminate listings for details.
- Wood grain laminates on corner worksurfaces up to 42” available in laminate run diagonally for an upcharge. Otherwise, standard horizontal application of laminate will be used.
- To avoid unsatisfactory results in laminate application when attaching two corner surfaces side by side, select “WG” surfaces for matching grain.
- Some wood grain laminate worksurfaces will have matching wood grain PVC trim unless specified otherwise.
- The depth of the worksurface scoops are 1 1/8” when measured from the panel the worksurface is attached to.

- All worksurfaces have threaded inserts for metal-to-metal connection for support hardware.
- All worksurfaces require support hardware. These are priced separately within this section.
- Communication and electrical wires are routed through a cable scoop located at the back of the worksurface. Depending on the specific surface, note that the number of cable scoops depends upon the width of the worksurface. All worksurface shapes have at least one scoop on the Panel edge.
- A 3/8” separation between the back of the worksurfaces and panels allows for cables to be moves to the panel seams and concealed by wire managers.
- Note: Wood veneer options for worksurfaces are available at an upcharge and with an extended lead time. Contact Evolve Customer Support for details.
- Tungsten (TUN) and Designer White (DWT) trim available at no charge.
- Note the following abbreviations:
  TF = Thermally-Fused Laminate; (1”) HP = High-Pressure Laminate (1 1/16”); HPW = High-Pressure Laminate (1 7/16”); WG = Wood Grain
This page provides a three dimensional view of a sample configuration highlighting each Worksurface component required when specifying this configuration.

**Components**

A. EVWVL2436 Curvilinear Worksurface – Left  
   Note: When deepest end equals 24”, opposite depth is 18”  
   When deepest end equals 30”, opposite depth is 24”

B. EVWCC3618 Corner Curved Worksurface

C. EVWR2436 Curvilinear Worksurface – Right

D. EVWTEV1536 End Transaction Surface with Cut-out
EVWS - STRAIGHT WORKSURFACE

- Support hardware must be ordered separately. See listing in this section of the price book.
- Worksurfaces greater than 48” wide require additional structural support.

### EVHEP - END PANEL
- Supports the worksurface and enhances the stability of connected panels.
- Provides solid support at the end of a run of worksurfaces.
- Finished in thermally-fused laminate.
- Includes flat brackets and hardware.
- End panel height is inclusive of panel glides extended to their fullest height.
- If wood grains is selected, grain runs vertically.

EVTHLEG - EVOLVE BRIDGES LEG
- Leg assembly attaches to panel for application which requires functionality of panels with environment of bridges tables.
- One leg wit horizontal member connection to 1” increment slots in connector. Provides support to panel and panel connected worksurface at end of run, design coordinated with Bridges freestanding tables.
- Supports 24” and 30” deep worksurface
- One leg can support 2 adjoining worksurfaces by specifying 2 flat brackets.
- Leveling glides is standard.
- No worksurface supporting beams, use panel cantilever and storage for worksurface support.
- One aluminum leg with steel structure - specify left or right and 24” or 30” deep for corresponding worksurface depth.
- Panel bracket, dislodgment clip and worksurface hardware included.
- Anodized aluminum upcharge $32.00.
- Please specify paint finish.
