When ordering Beam Extension Modules, Inline Extension Connectors (EVPIEC) must be ordered separately. Please see EVPIEC for details.

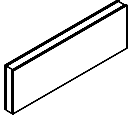

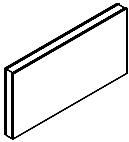

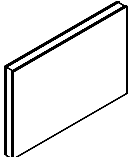

Inline Extension Connectors for Power Beam connect two Beam Extension Modules of equal height in a straight run.

Extension connectors do **not** provide support for hang-on storage components.

EXTENSION MODULES

EVPFE - FABRIC PANEL EXTENSION MODULE

- Attaches on top of a panel.
- Modules can be stacked to add privacy or divide space.
- Each side of the fabric module may have a different fabric within the same grade at no charge.
- Panel Extension Modules cannot install higher than 42" high above finished floor.
- If different grades of fabric are used on one module, the entire module must be priced at highest grade.
- When ordering Panel Extension Modules, additional connectors are required.
- Fabric on 66" and 72" wide fabric panel extension modules is applied railroaded. Any connecting beams in other widths should be specified with railroaded fabric as well to match.
- *Top Trims are not included with Extension Modules.
